

Vesseltracker™ Cockpit

Explore the world's most comprehensive and accurate picture of global shipping

Exclusive transparency into all vessel-related events and status changes

Extensive network

A highly interactive online platform for:

- Operations, equipment, engineering and service providers
- Logistics providers, vessel owners, operators and managers
- Financial institutions, insurance and law
- Chartering, vetting and commodity and energy traders
- Government and national security

Monitor over

180,000

vessels daily, in real time

Take advantage of the world's most comprehensive AIS network, with at least

\$1 million USD

Invested annually, in coverage expansion for

5 consecutive years

Time-saving automation

Use it to:

Engage in real-time and historical tracking of all AIS equipped vessels globally

Optimise cargo and port operations by staying up-to-date on vessel arrivals and departures

Follow fleets of interest more efficiently by using our advanced vessel search and filter tools

Easily meet compliance requirements with port and terminal calls, detailed vessel tracks and globally recognised zones

Record global commodity and energy movements and flows to make more informed business decisions

Improve border security against vessel threats with location data and status alerts
